

CORE APP STRUCTURE & NAVIGATION Development Discussion Note #1

May 1st 2026

Written by John Kim

1. App Overview

Mobile-first app (iOS + Android)

Purpose:

Allow users to find and join pickleball sessions

Operate on a credit-based system

Support hosted and non-hosted sessions

Allow Advertising (banner space for Sponsor, Also each games listed on the search will have the sponsor logo BOLDED right next to the session time)

2. Main Navigation (Bottom Tab Bar)

Home

Find Game (This is Centered)

Wallet

Profile

3. Home Screen

Purpose:

Quick overview + entry point to gameplay

Components:

Credit summary (VERY IMPORTANT):

Free credits (display in RED)

Paid credits (display in GREEN)

“Play Better” main CTA button

Suggested sessions (based on user behavior, perhaps we can focus on AI engines at a future date)

Sponsored / featured sessions (future-ready)

4. Login / Signup

Requirements:

Phone number login (OTP verification)

Name

Skill level: Beginner, Intermediate or Competitive

Email

Dupr

Occupation

5. Profile Screen

Components:

Name

Skill level (editable)

Past sessions (history)

Add friends from Profile

Create Team for League

Basic stats (optional later) (Jeffri and Hanzo can you follow up on what the stats and Hexagon should look like?)

6. Find Game Screen (MOST IMPORTANT)

Filters (MANDATORY)

A. Skill Level Filter (3 buttons) , Single-select or multi-select

Beginner, Intermediate or Competitive

B. Time Filter (3 buttons)

Morning, Afternoon or Evening

Multi-select

C. Location Filter Dropdown or selectable chips

Examples:

KLCC, Setapak, Kuchai Lama, Bukit Jalil, Puchong, Cheras, Mont Kiara, etc.

Session Listing

Each session must display:

Time (e.g. 8:00–10:00 AM)

(Sponsor Logo and Name if any)

Location (court name)

Session type:

Hosted or Non-hosted

Skill level tag

Remaining slots (out of 16)

Credits required:

2 credits (non-hosted) or 4 credits (hosted)

7. Session Detail Page

Displays:

Full session info

Player list including access to their profile

Host info (if hosted session)

Location details

CTA:

“Play Better”

8. Booking Logic

When user joins a session:

Credit deduction rules: Use free credits first then use paid credits

Validation:

If insufficient credits → block booking If session full → block booking

9. Session Rules

Each session:

2 courts, 16 players max, 2-hour duration

10. Wallet Screen (CRITICAL SYSTEM)

Must display: Free Credits (RED), Monthly allocation: 10 credits “Expires at end of month” with a Countdown or expiry indicator

Paid Credits (GREEN) Purchased credits with No expiry

11. Credit Purchase (Update wallet instantly after purchase)

Options:

10 credits = MYR 50

22 credits = MYR 100

Requirements:

Payment integration, Hanzo please confirm Payment Gateway availability for initial launch (after 1 month testing)

12. Monthly Reset Logic

Free Credits:

Reset to 10 every month with Unused credits, Do NOT carry forward and Expire completely

13. Credit Priority Logic

Use FREE credits first → then PAID credits

14. Push Notifications (VERY IMPORTANT FOR RETENTION)

Types of notifications:

A. Credit Reminder "You still have 6 free credits expiring soon"

B. Smart Game Suggestions Recommend sessions based on: skill level, location, time preference

"3 beginner games available near Kuchai tonight" "Kenny come join there are attractive ladies!!"

C. Engagement Nudges

"Haven't played this week"

"Your friends are playing today" (future)

15. Smart Recommendation Logic (Basic MVP)

Filter sessions based on: user skill level, nearest location, time of day

16. Admin / Backend Requirements

Must support:

Create sessions and assign host

Assign: time, location, hosted/non-hosted, Set capacity (default 16, 4-16), Track bookings

17. Data Structure (Simplified)

Hanzo please list require Data Structure here and lets discuss when ready. Thanks
