

PIKACIRCLE GAMIFICATION SYSTEM

Straight-to-the-Point Summary

1. Core Gamification Objective

The gamification system should support PikaCircle's main promise:

Get into better games.

Gamification should not be random badges, coins, or daily check-ins. It must help users feel:

- They are improving their player status
- They are becoming more trusted
- They are unlocking better games
- They are joining better player circles
- They are building reputation inside the community

Core loop:

Reputation → Access → Better Games → Social Status → Repeat Play

2. Main Gamification Principle

PikaCircle should gamify **access**, not just activity.

Bad gamification:

“Login daily to earn coins.”

Good gamification:

“Build your reputation to unlock better games.”

The best players in PikaCircle should not only be the strongest players. They should be:

- skilled
- reliable
- respectful
- active
- enjoyable to play with

3. Player Level System

Every player should have a visible level.

Level Name		Meaning
1	Open Player	New or casual player
2	Social Player	Active casual player
3	Trusted Player	Reliable and respectful player
4	Competitive Player	Strong and consistent player
5	Circle Elite	High-quality player with strong reputation

Important rule:

Player level should not be based only on skill.

It should include skill, reliability, sportsmanship, and activity.

4. Player Reputation Score

Each player should have a reputation profile.

Score	Meaning
Skill Score	Competitive level and playing ability
Reliability Score	Attendance, punctuality, low cancellation
Sportsmanship Score	Respectful behavior and fair play
Social Fit Score	Easy to play with, good group energy
Activity Score	Frequency of participation

This prevents toxic high-skill players from dominating premium games.

A high-skill player with poor attitude should not easily access the best games.

5. Access Unlock System

Status must unlock real benefits.

Access Level	Requirement
Open Games	New user
Recommended Games	Profile completed + first game joined
Trusted Games	High reliability score
Competitive Games	Verified skill level
Invite-Only Games	High overall reputation
Influencer Games	Premium user or high trust score
PikaCircle Club League	Verified player / club member

Key rule:

If status does not unlock better access, users will ignore it.

6. Attendance Streak

Reward real-world participation, not fake app usage.

Streak	Reward
2-week play streak	Streak badge
4-week play streak	Small credit reward
8-week play streak	Trusted Player boost
12-week play streak	Exclusive game eligibility

Avoid daily login streaks.

PikaCircle should reward weekly real play, not meaningless app opening.

7. No-Show and Cancellation Penalty

This is critical to protect game quality.

Behavior	Effect
Attend confirmed game	Reliability score increases

Behavior	Effect
Cancel early	No penalty
Cancel late	Reliability score decreases
No-show	Strong penalty
Repeated no-show	Temporary access restriction

Purpose:

Players must learn that access to better games requires commitment.

8. Post-Game Rating

After every game, players should rate the session quickly.

Recommended questions:

1. Was the game balanced?
2. Were players reliable?
3. Was the game enjoyable?
4. Would you play with this group again?

Keep it simple.

Do not make users answer too many questions.

9. Game Quality Labels

Based on ratings and player profiles, games can receive quality labels.

Label	Meaning
Balanced Game	Players have similar skill level
Trusted Game	Reliable players, low cancellation risk
Social Game	Friendly and casual
Competitive Game	Higher intensity
Premium Game	Curated high-quality session

This makes “better games” visible inside the app.

10. Meaningful Badges

Badges must have real meaning, not decoration.

Badge	Meaning
Verified Player	Skill/profile verified
Trusted Player	High reliability
Good Sport	Strong sportsmanship
Consistent Player	Regular weekly play
Club Player	Represents a club
League Player	Joined PikaCircle Club League
MVP	Won player-of-the-game
Clutch Player	Performs well in close games
Host Hero	Creates quality games
Community Builder	Brings new players

Badges should improve trust and player identity.

11. Host Ranking

Good hosts are important because they create active games.

Host performance should be tracked.

Metric	Meaning
Games Hosted	Activity
Attendance Rate	Players show up
Game Quality Score	Players enjoy the hosted game
Repeat Players	People come back
Cancellation Rate	Operational reliability

Host badges:

- Trusted Host
- Premium Host
- Community Host
- Competitive Host

This turns strong hosts into community leaders.

12. Club Gamification

Each club should have its own progression system.

Club Metric	Meaning
Club Level	Overall club progress
Club XP	Participation and activity
Club Reputation	Sportsmanship and reliability
Club Support Score	Supporter engagement
League Standing	Competitive ranking
Trophy Cabinet	Achievements and history

Suggested club levels:

Level Name

- | | |
|---|------------------|
| 1 | New Club |
| 2 | Active Club |
| 3 | Trusted Club |
| 4 | Competitive Club |
| 5 | Elite Club |
| 6 | Legacy Club |

This builds long-term club identity.

13. PikaCircle Club League Gamification

PCL should be one of the strongest retention engines.

Recommended league gamification:

Mechanic	Purpose
League Table	Weekly competition
Player Stats	Personal pride
MVP Voting	Supporter engagement
Club Support Ranking	Non-player participation
Rivalry Week	Emotional tension
Clean Sweep Bonus	Extra excitement
Close Fight Bonus	Keeps weaker clubs motivated
Fan Favourite Award	Social participation
Golden Paddle Award	Player status
Club of the Season	Rewards more than winning

PCL should feel like a season-long story, not just a tournament.

14. Weekly Missions

Use simple weekly missions to increase activity.

Player Missions

Mission	Reward
Join 1 game this week	XP
Play with 2 new players	Social badge progress
Complete post-game rating	Trust score boost
Attend without cancellation	Reliability boost
Join a balanced game	Game quality XP

Club Missions

Mission	Reward
Bring 5 supporters	Club support points
Submit lineup early	Reliability bonus
Post club content	Social points
Complete all scheduled matches	Club XP
Recruit 2 new members	Growth badge

Missions should drive real-world activity.

15. Leaderboards

Use multiple leaderboards so more users can win status.

Leaderboard	Rewards
Top Players	Competitive performance
Most Reliable	Responsibility
Best Sportsmanship	Good behavior
Most Active	Frequent participation
Top Hosts	Game creators
Rising Players	Improvement
Club Supporters	Fan participation
PCL Club Ranking	League performance

Do not show only top competitive players.
That will discourage casual users.

16. XP, Credits, Badges, and Tiers

Keep the system simple.

System Purpose

XP Progression and level

System Purpose

Credits Join games, redeem offers, trial access

Badges Identity and trust

Tiers Access control

Recommended rule:

- XP is for status
- Credits are for utility
- Badges are for identity
- Tiers are for access

Do not mix everything into one confusing system.

17. Free Credit Rewards

Free credits should reward actions that grow the ecosystem.

Action	Reward
Complete profile	Free credit
Join first game	Free credit
Invite verified player	Credit bonus
Host a good-rated game	Credit reward
Maintain 4-week attendance streak	Credit reward
Join PCL as player/supporter	Credit reward

Free credits should encourage behavior that improves liquidity and retention.

18. Player Card

Each user should have a shareable player card.

Player card should show:

- Name

- Player level
- Skill rating
- Reliability score
- Sportsmanship badge
- Favorite play style
- Club
- PCL record
- MVP count
- Games played

Example:

PikaCircle Player Card

Daniel

Trusted Player

92% Reliability

18 Games Played

3 MVP Awards

This becomes social media content and word-of-mouth marketing.

19. Match History and Personal Stats

Players should be able to track progress.

Recommended stats:

Stat	Purpose
Games Played	Activity pride
Win-Loss Record	Competitive tracking
Favorite Partner	Social connection
Best Streak	Motivation
Reliability Rating	Trust signal
MVP Count	Status

Stat	Purpose
------	---------

Club Contribution Identity

Skill Progression Improvement

Do not overwhelm users with too many stats in V1.

20. Seasonal Reset

Use seasons to keep the system fresh.

Every 2–3 months:

- Reset seasonal leaderboard
- Keep lifetime achievements
- Launch new badges
- Start new challenges
- Begin new PCL season
- Update club rankings

Recommended structure:

Item	Reset?
------	--------

Seasonal Leaderboard	Yes
----------------------	-----

Lifetime Profile	No
------------------	----

Legacy Badges	No
---------------	----

Club Trophy Cabinet	No
---------------------	----

Current Missions	Yes
------------------	-----

This prevents early users from becoming impossible to catch.

21. Social Sharing Moments

Gamification must create shareable content.

Auto-generate share cards for:

- First game completed

- New badge unlocked
- Level up
- MVP award
- Club win
- PCL standings
- Rivalry match
- Final result
- Player of the week
- Club of the week

This gives PikaCircle free organic marketing.

22. What Not to Do

Avoid these mistakes:

1. Too many badges from day one
 2. Daily login streaks
 3. Ranking only by wins
 4. Ignoring no-show behavior
 5. Letting toxic high-skill players dominate
 6. Making casual players feel inferior
 7. Giving credits without business logic
 8. Building fantasy league too early
 9. Overcomplicating scoring formulas
 10. Making gamification feel childish
-

23. Recommended V1 Gamification

V1 should be simple and practical.

Include:

1. Player Level

2. Skill Rating
3. Reliability Score
4. Post-Game Rating
5. Game Quality Label
6. Attendance Streak
7. Free Credit Rewards
8. Player Card

Goal:

Make users feel that good behavior and regular play help them access better games.

24. Recommended V2 Gamification

V2 can add deeper engagement.

Include:

1. Badges
2. Host Ranking
3. Club Profiles
4. Club XP
5. PCL Stats
6. MVP Voting
7. Club Support Ranking
8. Weekly Missions

Goal:

Build community identity and club loyalty.

25. Recommended V3 Gamification

V3 can add advanced ecosystem features.

Include:

1. Fantasy PCL

2. Advanced player analytics
3. Premium challenges
4. Sponsored missions
5. Seasonal battle pass with non-cash rewards
6. Regional rankings
7. City championship
8. Club trophy cabinet

Goal:

Turn PikaCircle into a full sports-social ecosystem.

26. Final Gamification Strategy

The strongest gamification system for PikaCircle is:

Reputation → Access → Better Games → Social Status → Repeat Play

PikaCircle should reward users for:

- showing up
- playing fairly
- being reliable
- improving skill
- creating good games
- supporting clubs
- joining leagues
- building the community

Final principle:

Gamification must make better games possible, not just make the app look fun.
