

Main Business Strategy

Users must consistently feel they are getting into better games

@playcircle is not purely a transactional app nor a booking app.

It is a: Subsidised participation platform designed to grow the pickleball ecosystem where free play drives adoption and Paid users drive partial monetisation. Sponsors fund growth and we build out Marketplace to capture long-term value. Long-Term Monetisation as the user base grows, revenue expands into : Equipment (paddles, apparel), Coaching & training, Leagues & tournaments, Food & beverage partnerships and Travel & experiences

@playcircle is a credit-based pickleball engagement platform designed to maximise participation through subsidised play, while monetising through:

Paid credits (primary revenue), Sponsorships (subsidy offset), Future marketplace (equipment, F&B, coaching, experiences), Core Unit Economics (Per User)

Credit System

Each user receives 10 free credits/month

1 session =

2 credits (non-hosted)

4 credits (hosted)

Paid credits:

10 credits = MYR 50

22 credits = MYR 100

 **Effective price $\approx$ MYR 5 per credit**

 **Usage Assumption**

Average: 5 sessions per user/month

@playcircle — Roadmap & Milestones Summary

(adapted from Jeffri's original roadmap)

@playcircle's roadmap is a phased execution strategy designed to take the platform from concept to scalable sports ecosystem. The approach prioritises:

Early validation before building – I suggest we skip the questionnaire and other approaches. We aim to launch the beta App with controlled games as a trial run. We will run various A B testing to improve on the UX/UI of the APP.

The core philosophy is simple:

Build great games first → allow for early monetization with Credit purchase or subscription → build more products (leagues, coaching, travel → marketplace → then scale

Core Target group for the first 6 months:

We will cover both existing pickleball players and also new players with zero experience.

The business is tracked across 5 layers:

Acquisition: installs, conversion rates

Activation: onboarding completion, first game joined

Retention: weekly active users, repeat play

Engagement: games per user, ratings activity

Monetisation: conversion to paid, revenue per user

Depending on these key Metrics, we will focus on pivots, changes and executions

Phased Execution Strategy

Phase 0 — Validation

1st and 2nd week of June (10 Games)

Test whether players want “better, curated games”

Success = users clearly prefer structured, higher-quality games

This will decide the ratio between Hosted and Non Hosted games.

Base Assumptions

Item	Value
Courts per session	2
Duration	2 hours
Court cost	MYR 20/hour
Total court cost/session	MYR 80
Host cost (hosted only)	MYR 100
Players per session	16

Base Cost Breakdown (Per Player)

Component	Non-Hosted	Hosted
-----------	------------	--------

Court cost per player	MYR 5.00	MYR 5.00
Host cost per player	MYR 0.00	MYR 6.25
Total cost per player	MYR 5.00	MYR 11.25

@playcircle — Monthly Cost Table (270 Sessions)

Hosted %	Non-Hosted %	Hosted	Non-Hosted	Monthly Cost	Session	Player
0%	100%	0	270	21,600	80	5.00
10%	90%	27	243	24,300	90	5.63
20%	80%	54	216	27,000	100	6.25
25%	75%	68	202	28,400	105	6.56
30%	70%	81	189	29,700	110	6.88
40%	60%	108	162	32,400	120	7.50
50%	50%	135	135	35,100	130	8.13

**** Important Note****

Without early Credit purchase, Sponsorship, Subscription, Free Courts, Free Coaching, Our Budget of MYR 35,000 will not be sufficient for 3 months let alone 6 months.

Phase 1 — Controlled Community Build

3rd and 4th week of June (20 Games)

Focus: Create initial liquidity and consistency

Recruit 50–100 core players

Run games manually with curated matching

Build weekly play habits

Success = users return weekly and experience better games than public play

Phase 2 — Product Launch

July (270 Games)

All contracts (bulk Purchase of courts, hosts participation and coaching are confirmed)

Focus: Launch MVP app with core features

Game creation and booking system

Player profiles and skill levels

Basic ranking system

Free credit onboarding

Purchase credits and subscription

Success = users can easily find and join relevant games

Phase 3 — Engagement & Retention (Months 3–5)

August, September, October (600+ Games)

Focus: Build habit loops and identity

Introduce ranking, tiers, and ratings

Improve matchmaking quality

Add recommended games

Initiate League – Fees are collected for Leagues. MYR 500 per Team of 6 players. Guaranteed 50 games for a half year season.

Success = users play frequently and care about their level and progression

Phase 4 — Monetisation

November to December (300+ Games ongoing on a monthly basis)

Focus: Introduce revenue carefully

Launch premium subscription

Offer exclusive games and experiences

Test pricing strategies

☒ Success = users see clear value in paying for better access

Phase 5 — Scale Subject to further discussion

Focus: Expand geographically and operationally

Replicate community model in new locations

Partner with courts and brands

Increase marketing efforts

Success = scalable, repeatable growth across cities

Month	Total Users	Active Users	Paying Users (15%)	Revenue (MYR)	Cost (MYR)	Net (MYR)
1	150	120	18	900	29,700	-28,800
2	250	200	30	1,500	29,700	-28,200
3	350	280	42	2,100	29,700	-27,600
4	500	400	60	3,000	29,700	-26,700
5	650	520	78	3,900	29,700	-25,800
6	800	640	96	4,800	29,700	-24,900
7	900	720	108	5,400	29,700	-24,300
8	1,000	800	120	6,000	29,700	-23,700
9	1,100	864 (CAP)	130	6,500	29,700	-23,200
10	1,200	864 (CAP)	130	6,500	29,700	-23,200
11	1,300	864 (CAP)	130	6,500	29,700	-23,200
12	1,400	864 (CAP)	130	6,500	29,700	-23,200
